

Horizon Eye Care Group

Notice Regarding Vision Insurances

Any patient who comes in for a routine vision exam or refraction is required to know what their vision insurance is prior to their appointment. If the patient presents for a routine vision exam or refraction and does not know what their vision insurance is at the time of service they will be expected to pay out of pocket.

We will attempt to assist the patient to the best of our ability to determine any vision coverage; however, it is ultimately the patient's responsibility to know coverage and benefits.

If it is determined after the date of service that the patient has vision insurance, the patient will be expected to submit to their insurance themselves. We will provide the patient with an itemized receipt for submission if necessary. Horizon Eye Care Group, P.C. will not be responsible for back dated submission.

If the patient does not provide vision insurance coverage and glasses are ordered through our private lab we will not submit to the insurance after the date of service. We also will not provide refunds for any glasses submitted to our private labs due to our out of pocket costs.

We appreciate your understanding in this matter.

I have read and agree to the above notice regarding vision insurances and have determined that (check the appropriate box):

My Vision Insurance is _____

I do not know my vision insurance carrier and will pay out of pocket with no refunds if I find out I have vision coverage at a later date.

I have no vision coverage and will pay out of pocket.

Date: _____

Name of Patient: _____

Signature of Patient: _____

Relationship to Patient: _____
